

Daniyl 7 warns of the “little horn”, one of the most wicked entities spoken of in the Bible found in the fourth beast (Roman) government, that would “think to change times and laws”. This “little horn” altered “times” (appts/calendars) by replacing the biblical soli-lunar calendar with the solar-based Julian calendar of Julius Caesar, brought forth under the heretical authority of his pagan priest office of Pontifex Maximus, a title handed down to all subsequent “Popes”, and also to Constantine who replaced Passover with “Easter”/Ishtar. While undergoing many edits by the “Pontifex Maximus” Popes, the current Gregorian calendar arose as the false time-keeping process many follow to this day. Here, we have placed Yahweh’s calendar into a Gregorian framework for ease of access to Yahweh’s appointments. The term “calendar” is derived from a Latin phrase that means “to call out”, and originally applied to the first visible crescent of the New Moon.

MARCH 2026

The Moon can take various amounts of time each month to go through its complete darkness around conjunction; this variation because of the Moon’s orbital anomalies. There are no passages in the Catholic or Protestant Bibles that declares when a “new moon” is specifically. However, Enoch, a book in the Ethiopic Bible, and available as a Pseudopigrapha writing in numerous western scholarly circles, states the last day of the month will have no light showing upon the moon’s surface, Enoch 78, and the first day will be the day the first visible crescent appears, Enoch 73. It is important to remember, Enoch divides the moon’s complete cycle into two, with 14 days for the first part, and 15 days for the second part.

Daniyl 7 warns of the "little horn", one of the most wicked entities spoken of in the Bible found in the fourth beast (Roman) government, that would "think to change times and laws". This "little horn" altered "times" (appts/calendars) by replacing the biblical soli-lunar calendar with the solar-based Julian calendar of Julius Caesar, brought forth under the heretical authority of his pagan priest office of Pontifex Maximus, a title handed down to all subsequent "Popes", and also to Constantine who replaced Passover with "Easter"/Ishtar. While undergoing many edits by the "Pontifex Maximus" Popes, the current Gregorian calendar arose as the false time-keeping process many follow to this day. Here, we have placed Yahweh's calendar into a Gregorian framework for ease of access to Yahweh's appointments. The term "calendar" is derived from a Latin phrase that means "to call out", and originally applied to the first visible crescent of the New Moon.

NOVEMBER 2026

The Moon can take various amounts of time each month to go through its complete darkness around conjunction; this variation because of the Moon's orbital anomalies. There are no passages in the Catholic or Protestant Bibles that declares when a "new moon" is specifically. However, Enoch, a book in the Ethiopic Bible, and available as a Pseudopigrapha writing in numerous western scholarly circles, states the last day of the month will have no light showing upon the moon's surface, Enoch 78, and the first day will be the day the first visible crescent appears, Enoch 73. It is important to remember, Enoch divides the moon's complete cycle into two, with 14 days for the first part, and 15 days for the second part.
